Report
The 2020 report mentioned below shows our approach to CSR as well as providing insights that serves to demonstrate the Group’s economic, social and environmental performance throughout the year and its main achievements in terms of CSR.

MATERIALITY
CSR policies aim to guarantee that companies work ethically, considering human rights as well as the social, economic and environmental impacts of what they do as a business.

We reviewed previous year’s topics benchmarking ourselves with our competitors in the Oil and Gas Industry. A complete assessment was done so as to find the gaps in our practices and to fulfill those.

We established the materiality and relative priority of each topic:

- We considered ratings for the economic, environmental and social issues published in a CSR of a major oil and gas company.
- We created our CSR Velosi committee conducting interviews noting down the severity of the problems marking each as high, low or medium
- By the practices that we did we created a matrix that helped us to prioritize the material aspects
