

QHSE Policy Statement

(Quality "ISO 9001:2015", Health & Safety "ISO 45001:2018, Environment "ISO 14001:2015")

Velosi Asset Integrity Limited Management is committed to Provide Consultancy for Energy Sector Offering Asset Integrity Management Services, Health, Safety and Environmental Services, Engineering Services and Software Services with the aim of enhancing customer satisfaction.

A great importance is placed on ensuring appropriate Quality, Health, Safety & Environmental processes are implemented that ensure compliance to the appropriate governing standards as well as applicable legislative, regulatory and customer-based requirements.

Our commitment to continual improvement is demonstrated through targets and objectives that are set annually and its achievement is followed up by the management through the implementation and monitoring of the QHSE management system to look for operational excellence. These objectives are aligned and coherent with the context of the organization, the intended results and requirements of our relevant interested parties. This helps to increase the focus on key areas such as customer satisfaction and development of staff competencies, which in turn will lead to a better level of service for our clients.

The core principle of this policy focuses on the promotion of continuous improvement in a safe and sustainable environment which is based on and defined with the following criteria:

- Tendency to create sustainable value based on profitability and on sustainable profits, while avoiding costs derived from defective works, delays and from any activity which in general does not provide any real added value.
- Have a systematic approach to QHSE management to ensure compliance with the legislation applicable to the country of operations as well as any other stipulated requirements as demanded by the scope of work provided
- Efficiency and excellence in the company's internal management so as to develop and implement an integrated QHSE management system which covers occupational risk prevention, economic, technical, legal and social issues, as well as environmental protection. Such system shall be based on corporate guidelines and international criteria and includes continual improvement in the management and performance of our QHSE system.
- Requirements concerning rigor, impartiality, confidentiality and truthfulness at all levels in our professional activities; a principle based on independence and on corporate values included in our Code of Ethics.
- Priority to the preventive approach as opposed to the corrective approach when developing processes while ensuring our employees' health and safety as well as that of contractors and interested parties that fall under the organization's duty of care through proper planning and communication. This includes regular review and mitigations of associated risks and hazards utilizing the hierarchy of control measures.
- Safeguarding the security and well-being of its personnel, equipment and facilities as well as ensuring the security of information possessed by Velosi particularly those deemed of a sensitive or confidential nature.
- Priority to prevent environmental damage and environmental pollution as well as efficient use of resources as a result of our activities and those of our suppliers and contractors.
- Leadership and commitment with our human staff, while fostering team work and the participation and consultation of employees at all company levels so as to become an attractive organization full of company-proud members. Creating an atmosphere in which employees can combine their personal and professional life while developing their professional skills and potential.
- Adaptation of risk based management system that focuses on internal & external risk elements to ensure that business and customer requirements are met consistently.
- Promotion and support to social initiatives which might lead to cultural development and to an improvement of social conditions such as the prevention of child labor, anti-slavery and human-trafficking.

- Provision of state-of-the-art technical means, while especially promoting and supporting the use of new technologies as a tool to foster changes and continuous improvement.
- Promotion to innovation, including research and development activities, while fostering the collaboration and knowledge exchange with other bodies concerning projects of mutual interest.
- Collaboration with customers and external providers, fostering relations based on trust, honesty, openness and mutual respect, and adopting processes and organizational structures which might facilitate our relations with them and help us meet their expectations.
- Truthful and open dissemination of the company's achievements and future plans.

All VELOSI members must acknowledge review of and compliance with this policy, which shall be implemented by means of a documented system available for all the concerned parties and which is reviewed periodically to ensure that it remains relevant and appropriate.

Mr. Ijaz ul Karim
Managing Director
Velosi Asset Integrity Limited.
