

# RBI Technical Training

Technical Training will help to understand the use of RBI technology for equipment and piping, train attendees to attain necessary skills for implementing RBI in accordance with API 581 and API 580, and the reasons for implementing RBI. This will also cover the benefits and practical application of RBI and planning successful RBI projects.

The course will enable learning the practical likelihood and consequence analysis, inspection plan preparation and optimizing maintenance and inspection intervals, implementing risk mitigation actions and overview of related API documents like API 510, 570, 571 & 653.

## Benefits of RBI Technical Training

- Deep understanding of RBI technology
- Equip necessary skills to conduct RBI studies
