

VAIL ERP

Streamline your business

ENTERPRISE RESOURCE PLANNING

www.velosiaims.com

An Enterprise Resource Planning (ERP) system is a compact software tool that helps you control different or all parts of your business. There are different modules for different scopes of your business with practices to record data and to generate transactions. For instance, a Human Resources (HR) module comprises practices for employees, salaries, and other transactional activities to process payrolls.

ERP also encompasses various other reports and some even enable creating your own reports. In short, an enterprise resource planning tool is a consolidated platform of your business.

VELOSI EXPERTISE & METHODOLOGY

VAIL- ERP is an enterprise resource planning software a.k.a business management application that provides integrated, cost-effective and comprehensive enterprise resource planning solutions. VAIL- ERP package is designed in such a way to support and merge almost every functional area of a business process, containing procurement of goods and services, sale and distribution, accounting, finance, and human resource management.

It is much easier to document and administrate all your business data and transactions using VAIL - ERP system compared to using multiple software tools or spreadsheets. All these set of data is interconnected, making it smoothly accessible across business departments. This can only be achieved when all modules in an ERP share the same data source or database.

BENEFITS OF VAIL – ERP SYSTEM:

- Helps you streamline all your business processes
- Offers an integrated platform to manage business
- Enables you to manage customers, suppliers and staff
- Perfect for both mid-sized and larger enterprises
- Provides accurate and detailed reports
- Ensures high productivity
- Offers back-up for data
- Apt for remote work
